ABOUT ADENOR GLOBAL

Connecting Quality Products with Global Markets

ADENOR GLOBAL is an international trade and business solutions company focused on connecting selected products with customers across global markets. We combine customer-focused communication, commercial coordination and export process management to provide reliable and efficient solutions for our international partners.

In agricultural products and plant nutrition solutions, our role is to understand customer requirements, coordinate the appropriate product portfolio and manage the commercial process from inquiry to shipment.

International Trade

Global customer and market-oriented commercial development.

Product Portfolio Coordination

Selected products and solutions according to customer requirements.

Quotation & Commercial Management

Product, packaging, quantity and Incoterm-based quotation coordination.

Export & Shipment Coordination

Support throughout documentation, logistics and shipment planning.

HOW WE WORK

1. Customer Requirement
2. Product Selection
3. Commercial Offer
4. Order Coordination
5. Shipment

WHY ADENOR GLOBAL

- Customer-focused approach
- Clear commercial communication
- Selected export portfolio
- End-to-end coordination

Advanced Plant Nutrition Portfolio

Selected Liquid, Organomineral and Specialty Solutions for International Markets

Customer-focused export presentation of selected crop nutrition and specialty input solutions.

- Specialty Plant Nutrition
- Organomineral Solutions
- Micronutrients & Trace Elements
- Support Products
- Enhanced Crop Performance

1 L • 5 L • 20 L formats

Selected portfolio includes specialty liquids, micronutrients, organominerals and support products.

TRUSTED FERTILIZER SOLUTIONS FOR A SUSTAINABLE TOMORROW

Portfolio Overview

Selected Specialty Plant Nutrition Solutions

This portfolio brings together selected liquid, organomineral, micronutrient and specialty support solutions presented by ADENOR GLOBAL for international markets.

Core Product Range

Master Effect
Liquid organic fertilizer containing plant-derived amino acids

Zenova
Zinc fertilizer suspension

Venibest 7.7.7
NPK liquid organomineral fertilizer

Master-K 10
Potassium solution

AnnaSoil pH Adjuster
Soil pH management support

Specialty & Micronutrient Solutions

Combi
Trace element blend: Zn 4, Mn 4, B 4, Fe 1, Mo 0.1

MGS Bioplantoria
Leaf and soil disinfectant

Calmania +B
Calcium 13, Boron 0.5, Magnesium 2

MGS Peraphos
Phosphoric Acid 61

MGS NitroNiva
Nitrogen 21

MGS Potas Plus
Nitrogen 10, Potassium 20

Available formats: 1 L • 5 L • 20 L | 25 KG

NOURISHING GROWTH ACROSS BORDERS

GLOBAL AGRICULTURE STRONGER TOMORROW

Master Effect

Soil Support • Plant-Derived Amino Acids

TRUSTED FERTILIZER SOLUTIONS FOR A SUSTAINABLE TOMORROW

Liquid organic fertilizer containing plant-derived amino acids.

- Supports microbial activity in the soil
- Supports nutrient uptake
- Encourages root development
- Supports efficient fertilizer use
- Supports organic matter management
- Supports fruit formation and balanced development

1 L • 5 L • 20 L

USAGE AREAS

Foliar application:
1–2 L per 100 L water

Drip / sprinkler system:
1–2 L per decare

Frequency varies by crop/local conditions; confirm current label/technical guidance.

Guaranteed Content

Component	Value (W/W)
Organic Matter	30%
Organic Carbon	10%
Organic Nitrogen	3.5%
Water-Soluble Potassium Oxide (K_2O)	2.5%
Free Amino Acids	4.5%
pH	4 – 6

Zenova

Zinc Fertilizer Suspension

TRUSTED FERTILIZER SOLUTIONS FOR A SUSTAINABLE TOMORROW

A zinc suspension designed for foliar, drip and seed coating applications.

- Supports fine root and lateral root development
- Supports flowering and fruit set
- Supports healthy germination in seed coating programs
- Supports tillering
- Supports nutrient availability and uptake

1 L • 5 L • 20 L

APPLICATION AREAS

Foliar:
250–500 ml per 100 L water

Drip / sprinkler:
2–3 L per decare, every 20–25 days

GUARANTEED CONTENT

Component	Value (% w/w)
Water-Soluble Zinc (Zn)	4%

NOURISHING GROWTH ACROSS BORDERS

GLOBAL AGRICULTURE
STRONGER TOMORROW

Venibest (7.7.7)

NPK Liquid Organomineral Fertilizer

TRUSTED FERTILIZER SOLUTIONS FOR A SUSTAINABLE TOMORROW

- Supports balanced nutrition throughout growth stages
- Supports resilience under stress conditions
- Supports balanced plant development
- Supports soil biological activity
- Supports vigorous sprouting and growth

AREAS OF USE

For all crop cultures:

- Foliar applications: 250 ml per 100 L water
- Drip / sprinkler systems: 1–2 L per decare, at 20–25 day intervals

GUARANTEED CONTENT

Component	Value (W/W)
Organic Matter	10%
Total Nitrogen	7%
Nitrate Nitrogen	1.8%
Urea Nitrogen	5.2%
Total Phosphorus Pentoxide (P_2O_5)	7%
Water-Soluble Phosphorus Pentoxide (P_2O_5)	7%
Water-Soluble Potassium Oxide (K_2O)	7%
pH	2–4
Max. Chloride	1.1

GLOBAL AGRICULTURE STRONGER TOMORROW

Master-K 10

Potassium Solution

A high-quality potassium solution supporting crop quality, calibration and overall plant performance.

- High-quality potassium source
- Supports crop quality and calibration management
- Supports potassium-demanding growth phases
- Supports fruit aroma and shelf life
- Compatible for mixed programs when appropriate

1 L • 5 L • 20 L

USAGE AREAS

Foliar: 250-500 mL per 100 L water

Drip / sprinkler:
2-3 L per decare, every 20-25 days

GUARANTEED CONTENT

Water-Soluble Potassium Oxide (K2O)	**10%**

AnnaSoil pH Adjuster

Soil pH Management Support

1 L • 5 L • 20 L

Supports soil pH management and pre-plant soil preparation.

- Supports soil pH balancing
- Supports sulfur nutrition
- Supports release of bound nutrients
- Supports faster breakdown of organic matter in soil

Pre-plant field application:
2-5 L per decare by sprayer or sprinkler.

Drip-irrigated fields / greenhouses:
Confirm current product rate from label / technical guidance before planting.

Application Guide Highlights

Indicative Foliar and Fertigation Programs

FOLIAR / LEAF APPLICATION

Verified product-page rates

PRODUCT	RATE	REFERENCE NOTE
Master Effect	1-2 L / 100 L water	All crop cultures
Zenova	250-500 mL / 100 L water	Foliar zinc support
Venibest 7.7.7	250 mL / 100 L water	All crop cultures
Master-K 10	250-500 mL / 100 L water	Potassium support
AnnaSoil pH Adjuster	Not specified for foliar use	Soil / pre-plant use

DRIP / SPRINKLER / SOIL APPLICATION

PRODUCT	RATE / TIMING	REFERENCE NOTE
Master Effect	1-2 L / decare, 20-25 day intervals	Drip / sprinkler
Zenova	2-3 L / decare, every 20-25 days	Drip / sprinkler
Venibest 7.7.7	1-2 L / decare, 20-25 day intervals	Drip / sprinkler
Master-K 10	2-3 L / decare, 20-25 day intervals	Drip / sprinkler
AnnaSoil pH Adjuster	2-5 L / decare pre-plant	Field: drip timing 4-5 days pre-plant*

Balanced Nutrition

Stronger Growth

Better Stress Tolerance

Higher Productivity

Application note

AnnaSoil: source states 2-5 L/da for pre-plant field application. For drip-irrigated fields, confirm the current product rate from the label / technical sheet.

All foliar and fertigation programs should be adjusted to crop stage, local conditions and agronomic guidance.

Request a Quotation

Let us help you build the right product mix for your market.

Tell us your requirements and our team will prepare a tailored offer with the most suitable products, packaging and shipment options.

How to Request a Quotation

1. Select Products
2. Share Required Quantity
3. Share Destination Country / Port
4. Share Preferred Incoterm
5. Share Required Documentation
6. Receive ADENOR GLOBAL Offer

Typical Information Requested

- Product name/code
- Quantity
- Preferred pack size
- Destination port/country
- Target delivery timing
- Special documentation needs

Selected product specifications, availability and shipment terms are confirmed at quotation stage.
