CONTENTS

Inside this catalogue

A concise guide to our company, commercial process and chemical raw materials portfolio

01 COMPANY PROFILE 03
Who we are and the role we play

02 HOW WE WORK 04
From inquiry and selection to shipment

01 ALKALIS AND MINERAL SALTS 05
- Potassium Carbonate E 501
- Potassium Hydroxide KOH

02 ACIDS AND PROCESS CHEMICALS 06
- Phosphorous Acid
- Salicylic Acid
- Gluconic Acid

05 MINERAL SALTS 09
- Calcium Chloride 94%

03 CHLORIDE SALTS 07
- Calcium Chloride 77
- Magnesium Chloride

04 AMINO ACID RAW MATERIALS 08
- Lysine Sulphate
- Lysine HCl

Product pack visuals are illustrative; confirmed unit and size are stated in the quotation.

ABOUT ADENOR GLOBAL

Connecting products with markets

An international trade and commercial coordination company

A clear route from selection to shipment

ADENOR GLOBAL connects selected agricultural products with international buyers. We coordinate product selection, commercial offers, order documentation and shipment processes around each order.

OUR ROLE

01 Product portfolio

A curated range presented by product family.

02 Commercial coordination

Product, quantity, packaging and trade terms aligned for the offer.

03 Order documentation

Order documents coordinated with the parties involved.

04 Shipment coordination

Export and delivery steps coordinated through to dispatch.

ADENOR GLOBAL coordinates sourcing and international trade; manufacturing is handled by the respective suppliers.

HOW WE WORK

From inquiry to delivery

The commercial steps behind each product order

01

Inquiry

Product, required quantity, destination and timing.

02

Product match

Review the portfolio and confirm the requested specification.

03

Commercial offer

Align price, packaging, trade terms and delivery plan.

04

Order preparation

Coordinate order confirmation and required documents.

05

Shipment

Coordinate dispatch and shipment documentation.

01 · ALKALIS AND MINERAL SALTS

Alkalis and Mineral Salts

Product profiles · Page 1 of 1

ALKALIS AND MINERAL SALTS

Potassium Carbonate E 501

Potassium carbonate (E 501)

DECLARED COMPOSITION
K2CO3 99.6%

PRODUCT DETAILS
Potassium carbonate (K2CO3) with 99.6% product specification.

APPLICATION
Chemical and fertilizer production; industrial applications

PACKAGING 25 kg bags

ALKALIS AND MINERAL SALTS

Potassium Hydroxide KOH

Potassium hydroxide (KOH)

DECLARED COMPOSITION
KOH minimum 90%

PRODUCT DETAILS
White hygroscopic potassium hydroxide flakes, minimum 90% KOH.

APPLICATION
Fertilizer formulation and chemical manufacturing

PACKAGING 25 kg bags

WITHIN THIS SUBGROUP

Compare the product profiles

Potassium Carbonate E 501	Potassium Hydroxide KOH
K2CO3 99.6%	KOH minimum 90%
APPLICATION	**APPLICATION**

ALKALIS AND MINERAL SALTS	

02 · ACIDS AND PROCESS CHEMICALS

Acids and Process Chemicals

Product profiles · Page 1 of 1

ACIDS AND PROCESS CHEMICALS

Phosphorous Acid

Phosphorous acid (H3PO3)

DECLARED COMPOSITION
Phosphorous acid (H3PO3)

PRODUCT DETAILS
White crystalline phosphorous acid used in phosphite production.

APPLICATION
Chemical intermediate; phosphite preparation

PACKAGING 25 kg bags

ACIDS AND PROCESS CHEMICALS

Salicylic Acid

Salicylic Acid

DECLARED COMPOSITION
Salicylic acid (C7H6O3)

PRODUCT DETAILS
Crystalline salicylic acid supplied as a chemical raw material.

APPLICATION
Chemical synthesis and industrial formulations

PACKAGING 25 kg bags

ACIDS AND PROCESS CHEMICALS

Gluconic Acid

Gluconic acid

DECLARED COMPOSITION
Gluconic acid (C6H12O7)

PRODUCT DETAILS
Colorless liquid gluconic acid used as a complexing and sequestering agent.

APPLICATION
Complexing and sequestering agent in industrial processes; also used in agricultural formulations

PACKAGING 250 kg drum

WITHIN THIS SUBGROUP

ACIDS AND PROCESS CHEMICALS

03 · CHLORIDE SALTS

Chloride Salts

Product profiles · Page 1 of 1

CHLORIDE SALTS

Calcium Chloride 77

Calcium chloride hydrate, CaCl2·xH2O

DECLARED COMPOSITION
CaCl2 above 77%

PRODUCT DETAILS
Calcium chloride hydrate grade above 77% CaCl2; hygroscopic and dissolves exothermically.

APPLICATION
Agricultural, food-production and industrial applications

PACKAGING 25 kg

CHLORIDE SALTS

Magnesium Chloride

Magnesium chloride (MgCl2)

DECLARED COMPOSITION
Magnesium chloride (MgCl2)

PRODUCT DETAILS
Magnesium chloride for chemical production, fertilizer and feed applications.

APPLICATION
Chemical raw material; also used in fertilizer and feed applications

PACKAGING 25 kg bags

WITHIN THIS SUBGROUP

Compare the product profiles

Calcium Chloride 77

CaCl2 above 77%

APPLICATION
Agricultural, food-production and industrial applications

Magnesium Chloride

Magnesium chloride (MgCl2)

APPLICATION
Chemical raw material; also used in fertilizer and feed applications

CHLORIDE SALTS

04 · AMINO ACID RAW MATERIALS

Amino Acid Raw Materials

Product profiles · Page 1 of 1

AMINO ACID RAW MATERIALS

Lysine Sulphate

Lysine sulfate

DECLARED COMPOSITION
Lysine sulfate

PRODUCT DETAILS
Lysine sulfate for animal nutrition formulations, including poultry feed.

APPLICATION
Animal nutrition formulations, including poultry feeds

PACKAGING 25 kg bags

AMINO ACID RAW MATERIALS

Lysine HCl

Lysine HCl

DECLARED COMPOSITION
Lysine hydrochloride

PRODUCT DETAILS
Lysine hydrochloride for animal nutrition formulations, including poultry feed.

APPLICATION
Animal nutrition formulations, including poultry feeds

PACKAGING 25 kg bags

05 · MINERAL SALTS

Calcium Chloride 94%

Calcium Chloride 94%

PRODUCT TYPE

Calcium chloride 94%

FORM

Flakes

DECLARED COMPOSITION

CaCl2 minimum 94% w/w

PRODUCT DETAILS

Calcium chloride flakes with minimum 94% CaCl2 content by weight.

APPLICATION

Chemical raw material

PACKAGING

25 kg bags

DOCUMENTS

Technical data sheet available upon request.
